LED DRIVERS

While most of the LED's included withh our luminaires/fixtures require a **constant voltage** LED driver our RGB and RGBW spots require a constant current driver.

The LED's included are compatible with most major brands of power supply includingMeanwell, Phihong provided they meet the correct current and voltage of the LED.

A = Constant output voltage 12V only

B = Driver with 2 alternative modes either constant current (1.6A) **OR** constant voltage (12V)

CONTROLLERS/REMOTE FOR COLOR CHANGING

RGB Spot: 3 Channel constant current Controller pre-set at max. 350mA per channel

RGBW Spot: 4 Channel constant current Controller pre-set at max 350mA per channel

RGBW Strip: 4 Chanel at 6Amps max load per channel

It is recommended that you seek the help of a licensed electrician or electrical engineer for load/power calculations and for selecting the appropriate configuration best suited to your project needs and for general installation help.

Note: All fixtures come with the LED chosen and wiring suited for connection to a class 2 power source and have a 2 year limited warranty. Dimmers,color changing remotes and controllers, power sources and power transfer accessories are not included.

USEFUL SOURCES FOR LED ACCESSORIES

Dimmers, LED RGB and RGB/W remote controllers, drivers and power transfer accessories and Class 2 Power Supplies are not include with our luminaires. We recommend working with a licensed electrician or engineer in understanding load and power requirements and in selecting the best and appropriate accessories for your project.

LED Controllers, Drivers, Receivers, Remotes, Power Supply Units

While we do not endorse any particular company or their products, the companies listed below specialize in supplying , power transfer units, LED drivers, controllers, dimmers and Class 2 Power Supplies. The list is not exhaustive and will be updated as we discover new sources and supportive products.

Electric Hinges, Power Transfer Units, Electric Locks

www.securityhardware.com

www.commandaccess.com

www.mckinneyhinge.com

Martin Pierce Hardware's illuminated fixtures have been UL tested and are under file E486357 as low voltage luminaires in compliance with: UL 2108, CAN/CSA 22.2 No.250, CAN/CSA 22.2 No.9

LISTED
E486357

Models LHP1000-1 A26MO; LHP1000-1 A32MO; LHP1000-1 A16MO; LHP2000-1 1C12C; LHP2000-1C11F; LHP2000-1 C11T are made to Weatherproof standard IP65

- All light fixtures that are attached to a wall or surface be securely supported by attachment to a stud or beam and must be mounted independently of any electrical box.

- While most LED's included in our luminaires require a constant voltage LED driver our RGB and RGBW color changing spots require a constant current driver, refer to Chart A1 Power Specifications to identify which models are constant current versus constant voltage.

- Our RGB and RGBW color changing spots will require a constant current controller that is set at 350mA per channel. For further details please refer to Chart A1 Power Specifications and to installation charts X1 (cylindrical door handles) and X6 (cylindrical sconces). For sources for LED accessories including constant current drivers and constant current controllers see page X7.

Warranty

There are 2 warranties for our low voltage luminaires – one for the LED light unit and light diffuser and one for the metal fixture.

Warranty for LED's

The LED unit complete with the wire harness and any light diffuser carries a 2-year limited warranty for manufacturing defects or product failure. The warranty is valid and applies only if our luminaire is properly installed and if the LED unit is used with the correct LED driver, controller and Class 2 Power Supply.
If an LED unit fails, please contact us so we can authorize the return of the LED unit only, we will require proof of date of purchase. The LED unit can be removed easily from the metal fixture and should be returned to us complete with the wire harness. Do not return the metal fixture. If, after inspection determine the defect was not caused by abuse or unauthorized repair or disassembly then we will replace the LED unit or other comparable LED unit.

MARTIN PIERCE HARDWARE

Safety Guidelines - Care Instructions - Warranty for Illuminated Fixtures

Martin Pierce Hardware's illuminated fixtures have been UL tested and are under file E486357 as low voltage luminaires in compliance with: UL 2108, CAN/CSA 22.2 No.250, CAN/CSA 22.2 No.9

Models LHP1000-1 A26MO; LHP1000-1 A32MO; LHP1000-1 A16MO; LHP2000-1 1C12C; LHP2000-1C11F; LHP2000-1 C11T are made to Weatherproof standard IP65

- Products are intended to be installed and serviced by a licensed electrician or electrical engineer.
- Advice should be sought in assessing load and power calculations and in selecting any necessary LED drivers, controllers, dimmers and Class 2 Power Supplies. We strongly recommend that all accessory products be UL or ETL approved or be approved by other reputable international testing agency.
- Do not connect directly to high voltage 120˜277V AC power. Products are intended for use only with a Class 2 Power Supply.
- Do not install the product in an environment outside -25°C +60°C. Temperatures outside this range may damage or reduce the life expectancy, brightness or otherwise negatively impact the LED unit.
- Each fixture comes with one LED unit and a wire harness comprising a 9" length of 22AWG UL Style 1007/1569 hook up wire. The LED unit is pre-wired and connected to the LED light unit. The other end of the wire harness has a crimped connector ready for connection to the appropriate Class 2 Power Supply (LED driver, transformer or controller or other device)
- Our products do not come with controllers, dimmers or Class 2 Powers Supplies
- Attached wire leads and other additional extension cables, connectors, etc. are not rated for in-wall installation.
- Ensure applicable wire is installed between our fixture and any controls in between as well to the power supply. When choosing wires, factor in voltage drop, amperage rating (in-wall rated, damp location rated etc.). Inadequate wire installation could overheat wires and cause fire.
- The LED units are pre-installed within our fixtures and are intended to be used only within our fixture; any other use will void the LED warranty.
- Our fixtures are intended to be used only with the LED unit that we have supplied and pre-installed and we cannot therefore support or warranty substitute LED units within our fixtures.
- Additional LED units may be purchased from Martin Pierce Hardware. When installing the replacement, to ensure proper functioning refer to the installation instructions and diagrams specific to the fixture (Forms X1 to X6). We recommend that replacement LED units be installed by a qualified licensed electrician.

FINISHES

ORDERING

WARRANTY

SAFETY

FINISHES

Some of our pieces are available in two categories of finish, corresponding to two different pricing bands. Our Morphic and Ergo pieces, as well as some sconces, are also available in stainless steel. Examples of each finish are shown here as accurately as the printing process will allow.

The color and metal of the strike and face plates is determined by the lock and latch manufacturer. We have selected the most appropriate strike plate finish to compliment our own finishes and this is shown alongside.

Hot Patina Bronze *(Price category R)*

These finishes are hot patinas that react uniquely with each bronze piece so that no two items will be the same. The colors will change over time in a manner determined by the local environmental conditions. To help prolong the life of the patina the pieces are finished with a clear lacquer which may slow the color change but not stop it.

FINISHES

Oil Rubbed Bronze *(Price category B)*

This is a hand rubbed oil finish which will change over time allowing each piece to develop its own unique patina.

Polished Bronze

Stainless Steel - Morphic and Ergo only *(Price category S)*

We offer 2 finishes polished-beaded and brushed. Through out the Ergo section of the catalogue you will see the polished- beaded finish. These pieces have both shinny and frosted or beaded areas, we typically frost the scoops and channels of an Ergo piece and leave the raised areas shinny and we make this artistic call.

We also have a new brushed steel finish which you will see on all of our Morphic pieces.

Polished-beaded
Order code SS

Strike plate

Brushed
Order code BS

Strike plate

HOW TO ORDER

With the many options offered by our range and the variety of possible door configurations it is important to identify precisely the pieces you wish to order. Please read the following notes in conjunction with the example order form on page 174.

Product Code

Three codes are shown against each item in the price list, ending in a letter denoting category of finish. Select the code which covers the category of finish you require as shown on the previous two pages.

e.g. PLS369B for a Willow passage way set in oil rubbed bronze

Finish Code

Chose a specific finish from within the category indicated by the product code. Again these are shown on the previous two pages. Note that we cannot process the order if the product and finish codes do not match.

e.g. LA

Door Thickness

It is important that we know the thickness of the door as this determines the length of the spindle and screws supplied with your order. We cater for industry standards of 1⅜", 1¾" and 2". If your door is not one of these standards then you will need to obtain a custom quote from our representative in your area.

Door Backset

The backset is the distance between the edge of the door and the center of the lever, Knob or lock as described opposite. This dimension is critical in determining the lock or latch we include with your order.

The standard backsets offered by the lock manufacturers we include with our trim are typically 2⅜", 2¾" and 3". However it is possible to order locks with greater backsets of upto 5" and even 6" but in this event you will need to contact our representative in your area for a custom quote.

Door Handing and Swing

Any door can be described quite correctly as either right handed or left handed depending on which side of it one is facing. It will also swing inwards or outwards. Many of our pieces come in right and left hand versions, use interior and exterior elements and take locks with latches for either inward or outward swings. Not surprisingly, therefore, opportunities for ordering errors abound so please use the guidelines below!

Take your viewpoint from the outside of the door. Eg. outside the bathroom door or outside the entry way door.

A right hand door has the hinges on the right, a left hand door has the hinges on the left. A door that swings away from you is considered normal, one that swings towards you is called a Reverse Bevel.

If you are ordering a number of identical pieces use multiple order lines if they have different handing and/or swing descriptions.

Even if you are ordering for a door that has no lock or latch i.e. a dummy trim, we still need to know the handing of the door to determine whether we send you a right lever and back plate or left lever and back plate.

The diagram opposite illustrates the handing and swing terminology.

Pricing

Our prices do not include freight charges, handling charges or the cost of insuring the product during transportation to you. We reserve the right to change our prices.

Where to Order

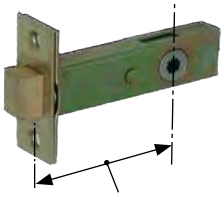
Please call us for a supplier in your area.

LOCK OPTIONS AND AVAILABLE BACKSETS

Tubular Latch

Available backsets:
2 ⅜", 3", 4" or 5 ⅛"

Tubular Deadbolt

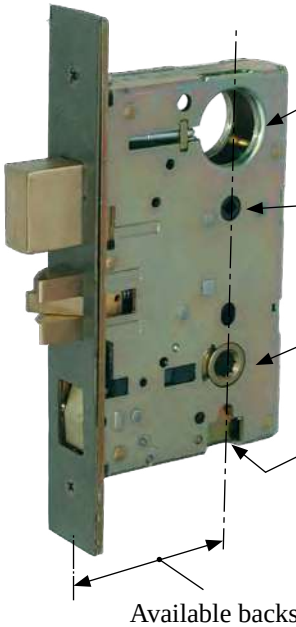


Available backsets:
2 ⅜", 3", 4" or 5 ⅛"

Privacy Mortise Lock and Latch

Available backsets:
2 ½" or 2 ¾"

Enry Way Mortise Lock



Available backsets:
2 ½", 2 ¾", 3 ¾", 5" or 6"

When ordering you will also need to specify thickness of door and handing.

PRODUCT CARE

Warranty for Door Hardware

Martin Pierce Hardware stands behind all of its bronze and stainless steel products with a lifetime guarantee on materials and workmanship. Internal mechanisms including locks, latches, fasteners supplied by Martin Pierce Hardware but manufactured by others are guaranteed for one year from the date of purchase.
Finishes are not covered by this warranty, please refer to care instructions below for useful notes on cleaning bronze and steel

Martin Pierce Hardware will not assume liability for any labor charges regarding the removal or reinstallation of its products; nor will we cover any freight, postage, or handling expense related to the product. Damages caused by accident, misuse, abuse, or improper installation are not covered by this warranty

Care and Cleaning

Bronze and steel are both naturally weather resistant requiring little maintenance and are simple to care for.
Our castings are made with 85% recycled metal and are made in the USA right here in Los Angeles.
Our stainless steel products are available in 304 stainless steel which has excellent corrosion resistance and upon request, in 316 stainless steel which is ideal for coastal areas as it is more resistant to corrosion from salt.

Bronze is an alloy made from copper, manganese and silicon and it will oxidize over time as it ages. Each piece will oxidize in its own way thereby creating a unique piece. The sun, wind, air, sea air and even the oils in your hand will all play their part in the way our hardware changes over time. These effects are naturally occurring and add character and maturity to each piece.
Cleaning all surfaces with a mild soap, water, and a non-abrasive cloth will help the hardware age gracefully. We recommend against the use of any cleaning agents that contain abrasives or chemicals as these may discolor or corrode the piece.
Our brushed stainless steel castings can be cleaned with a lint free or microfiber cloth and a stainless steel cleaner that should be applied in the same direction as the grain of the brushed surface. For polished surfaces the cleaner should be applied in a circular non directional pattern.

Individuality - Truly Hand-Crafted

Our hardware is made to order and each piece is "chased" or "cleaned" by hand, as a result no two pieces are identical. This individuality makes each piece a truly unique work of art. Please read our chapter “The Process” to learn more about how we make our hardware by hand.

Finishes, hot and cold patinas

Our hardware is available in a limited number of finishes which include some cold and hot patinas. All of these finishes will change over time giving each piece it’s own unique patina. There is no lacquer, cleaner or wax that can stop this natural process.

MARTIN PIERCE HARDWARE

Safety Guidelines - Care Instructions - Warranty for Illuminated Fixtures

Martin Pierce Hardware's illuminated fixtures have been UL tested and are under file E486357 as low voltage luminaires in compliance with: UL 2108, CAN/CSA 22.2 No.250, CAN/CSA 22.2 No.9

Models LHP1000-1 A26MO; LHP1000-1 A32MO; LHP1000-1 A16MO; LHP2000-1 1C12C; LHP2000-1C11F; LHP2000-1 C11T are made to Weatherproof standard IP65

- Products are intended to be installed and serviced by a licensed electrician or electrical engineer.
- Advice should be sought in assessing load and power calculations and in selecting any necessary LED drivers, controllers, dimmers and Class 2 Power Supplies. We strongly recommend that all accessory products be UL or ETL approved or be approved by other reputable international testing agency.
- Do not connect directly to high voltage 120˜277V AC power. Products are intended for use only with a Class 2 Power Supply.
- Do not install the product in an environment outside -25°C +60°C. Temperatures outside this range may damage or reduce the life expectancy, brightness or otherwise negatively impact the LED unit.
- Each fixture comes with one LED unit and a wire harness comprising a 9" length of 22AWG UL Style 1007/1569 hook up wire. The LED unit is pre-wired and connected to the LED light unit. The other end of the wire harness has a crimped connector ready for connection to the appropriate Class 2 Power Supply (LED driver, transformer or controller or other device)
- Our products do not come with controllers, dimmers or Class 2 Powers Supplies
- Attached wire leads and other additional extension cables, connectors, etc. are not rated for in-wall installation.
- Ensure applicable wire is installed between our fixture and any controls in between as well to the power supply. When choosing wires, factor in voltage drop, amperage rating (in-wall rated, damp location rated etc.). Inadequate wire installation could overheat wires and cause fire.
- The LED units are pre-installed within our fixtures and are intended to be used only within our fixture; any other use will void the LED warranty.
- Our fixtures are intended to be used only with the LED unit that we have supplied and pre-installed and we cannot therefore support or warranty substitute LED units within our fixtures.
- Additional LED units may be purchased from Martin Pierce Hardware. When installing the replacement, to ensure proper functioning refer to the installation instructions and diagrams specific to the fixture (Forms X1 to X6). We recommend that replacement LED units be installed by a qualified licensed electrician.

Martin Pierce Hardware's illuminated fixtures have been UL tested and are under file E486357 as low voltage luminaires in compliance with: UL 2108, CAN/CSA 22.2 No.250, CAN/CSA 22.2 No.9

Models LHP1000-1 A26MO; LHP1000-1 A32MO; LHP1000-1 A16MO; LHP2000-1 1C12C; LHP2000-1C11F; LHP2000-1 C11T are made to Weatherproof standard IP65

- All light fixtures that are attached to a wall or surface be securely supported by attachment to a stud or beam and must be mounted independently of any electrical box.

- While most LED's included in our luminaires require a constant voltage LED driver our RGB and RGBW color changing spots require a constant current driver, refer to Chart A1 Power Specifications to identify which models are constant current versus constant voltage.

- Our RGB and RGBW color changing spots will require a constant current controller that is set at 350mA per channel. For further details please refer to Chart A1 Power Specifications and to installation charts X1 (cylindrical door handles) and X6 (cylindrical sconces). For sources for LED accessories including constant current drivers and constant current controllers see page X7.

Warranty

There are 2 warranties for our low voltage luminaires – one for the LED light unit and light diffuser and one for the metal fixture.

Warranty for LED's

The LED unit complete with the wire harness and any light diffuser carries a 2-year limited warranty for manufacturing defects or product failure. The warranty is valid and applies only if our luminaire is properly installed and if the LED unit is used with the correct LED driver, controller and Class 2 Power Supply.
If an LED unit fails, please contact us so we can authorize the return of the LED unit only, we will require proof of date of purchase. The LED unit can be removed easily from the metal fixture and should be returned to us complete with the wire harness. Do not return the metal fixture. If, after inspection determine the defect was not caused by abuse or unauthorized repair or disassembly then we will replace the LED unit or other comparable LED unit.

Care and Cleaning

Bronze and steel are both naturally weather resistant requiring little maintenance and are simple to care for. Our castings are made with 85% recycled metal and are made in the USA right here in Los Angeles. Our steel products are available in 304 stainless steel which has excellent corrosion resistance and upon request, in 316 stainless steel which is ideal for coastal areas as it is more resistant to corrosion from salt.

Bronze is an alloy made from copper, manganese and silicon and it will oxidize over time as it ages. Each piece will oxidize in its own way thereby creating a unique piece. The sun, wind, air and even the oils in your hand will all play their part in the way our hardware changes over time. These effects are naturally occurring and add character and maturity to each piece.
Cleaning surfaces with mild soap, water and a non-abrasive cloth will help the hardware age gracefully. We recommend against using cleaning agents that contain abrasives or chemicals as these may discolor, corrode or scratch the surface of the piece.
Our brushed stainless steel castings can be cleaned with a lint free or microfiber cloth and a stainless steel cleaner that should be applied in the same direction as the grain of the surface. For polished surfaces the cleaner should be applied in a circular non-directional pattern.

Individuality – Truly Hand-Crafted

Our hardware is made to order and each piece is "chased" by hand ensuring that no two pieces are identical and that each is truly a unique work of art. Each casting is made using the lost wax method of casting which allows us to create exceptionally detailed and fluid hardware where function follows the dictates of form.

Finishes, hot and cold patinas

Our bronze castings are available in an oil rubbed finish and select pieces are also offered in a hot brighter patinas and all will change over time. Some of our work is also available in powder coated colors, please contact us for more information.
